

CONDITIONS FOR ACCEPTANCE

Special chemicals

EURAL code	160506*
Waste code	015012

DESCRIPTION

Various chemicals that are approved in advance by Renewi, based on a precise description (technical sheet or analysis) and specifications list.

ADDITIONAL CONDITIONS

Specific conditions:

- A specifications list must be made up for each collection with a precise description of the hazardous waste (product name of the waste substance, if possible with a technical sheet, physical condition, packaging and quantity per package, GHS symbols, UN number)
- This list will be reviewed by an acceptor from Renewi to determine whether acceptance is possible and, if so, under what conditions.
- Specific conditions may be imposed, depending on the waste stream, e.g. a max. weight per packaging. The product may have to be repackaged, depending on the product this can be done at the Renewi depot. Costs for this will then be communicated in advance.
- Collection is only possible after assessment and approval of the application by Renewi.

Packaging conditions:

- The waste must be packed in UN approved drums that are in good condition and that will be regarded as lost packaging.
- Different substances will be packed in separate drums according to their hazardous properties.
