

CONDITIONS FOR ACCEPTANCE

Ammonia in small packaging

EURAL code	060203*
Waste code	303003

DESCRIPTION

Ammonia solution, in packaging of a capacity of 5 litres or less, in good condition, packed in larger plastic open head drums.

ADDITIONAL CONDITIONS

Parameters:

- pH > 7
- Flashpoint > 61°C
- Liquid
- Sediment < 1%

General conditions:

- No ammonia gas in pressure receptacle
- No foreign objects (such as rags, wood, plastic, stones, bolts, etc.)
- No free fluid in the drums

Packaging conditions:

- The waste must be packed in tightly closed bottles (inner packaging) of a maximum capacity of 5 litres
- These bottles must in turn be packed in durable UN approved plastic open head drums (outer packaging) of 60, 120 or 200 litres, filled with absorbent material
- The bottles must be firmly secured with the closure at the top using suitable filling materials so that the bottles cannot break under normal transport conditions.
